PROFILE

Software Engineer with 3+ years of experience building scalable backend systems, RESTful APIs, and full stack applications. Experienced in Laravel, PHP, Node.js, React.js, Next.js, JavaScript, MySQL, AI, Web3 and Blockchain technologies, with hands-on experience developing diverse solutions across multiple business domains. Passionate about solving complex problems, exploring emerging technologies, and building reliable, scalable, and user-focused software solutions.

WORK EXPERIENCE

Telgoo5 – Noida, Uttar Pradesh, India

Software Engineer | June 2026 – Present

- Working on Billing and Fiber Management Systems, contributing to the development of scalable backend services and business workflows for telecom/service-management operations.
- Developing and maintaining RESTful APIs and backend services for billing, service management, and related application workflows, with a focus on performance, reliability, and scalability.
- Working on billing processes, service lifecycle management, and system integrations while ensuring reliable data processing and seamless communication between application modules.

Viral Pitch Technology Private Limited - Gurugram

Software Developer | Dec 2025 – Jun 2026

- Contributed to the development of an Influencer Discovery Platform, enabling brands and agencies to discover and connect with influencers based on campaign requirements and audience insights.
- Led backend development of the Outreach Module, building a Gmail-like communication system with features including email integration, template management, automated sequences, email sending/receiving, and real-time synchronization of email activities.
- Developed scalable backend services and RESTful APIs for influencer management, outreach workflows, and campaign operations, ensuring high performance and reliability.
- Built a Scraper Module using Redis, queue-based architecture, and pipeline processing to efficiently handle large-scale data extraction and asynchronous background tasks.

Inditab Esolutions Private Limited ~ EaseMyDeal – Noida, Uttar Pradesh

Backend Developer Engineer | July 2024 – Dec 2025

- Leading backend development for web and mobile platforms, including creating and maintaining robust RESTful APIs that ensure high performance and security.
- Successfully launched Hotel Booking Service and Go-VIP Service on the EaseMyDeal app, enabling users to access features like hotel reservations and premium subscriptions.

DIGIATURE TECHNOLOGY – Prayagraj, Uttar Pradesh, India

Software Developer Engineer | Nov 2022 – June - 2024

- Led development of scalable backend systems for various full-stack projects at Digiature Technology, ensuring efficiency and scalability through modern technologies and frameworks.
- Expanded expertise in backend development by contributing to web3 projects, including the development of decentralized applications (DApps), demonstrating adaptability to emerging technologies like Blockchain.

INTERNSHIP EXPERIENCE

ARUDAN TECHNOLOGIES – Prayagraj, Uttar Pradesh, India

Full Stack Developer | August 2022 – September 2022

- Led the development of a prototype website for Air India, implementing real-time features and thorough validation processes to enable seamless ticket booking functionality.
- Employed a range of technologies to create a responsive and intuitive user interface, while ensuring efficient data processing and validation to enhance user experience and system reliability.

PROGRAMMING KNOWLEDGE HINDI CHANNEL – Remote

Programming Tutorial Content Creator | May 2022 – June 2022

- Developed engaging and informative video tutorials on C language programming for the Programming Knowledge Hindi channel, catering to a diverse audience of learners.
- Demonstrated strong command over C language concepts and programming techniques, effectively conveying complex topics in a clear and accessible manner through video content creation.

EDUCATION

ALLAHABAD STATE UNIVERSITY – Prayagraj, U.P, India | 2019 - 2022

Bachelor Of Computer Application

SKILLS

Frameworks & Libraries: Laravel, CodeIgniter, React.js, Node.js, Next.js, Web3.js, jQuery

AI & Emerging Technologies: OpenAI GPT, Microsoft Gemini, AI Agents, Web3, Blockchain

Programming Languages: JavaScript, C, C++, PHP

Web Technologies: HTML, CSS

Databases: MySQL (Relational Database), Redis

Cloud & DevOps: Git, GitHub Actions

Development Tools: Visual Studio Code, Postman, Notepad++, Remix, Sublime Text, Cursor, Antigravity, Emergent

PROJECT

EDUCATION SYSTEM SOFTWARE (<https://udrcnet.org/>)

- Developed UDRCNET.org, a personal freelancing project, featuring an Education System software with interactive features like liking, disliking, and reviewing books, fostering user engagement.
- Incorporated a sophisticated ranking system, driven by algorithms analyzing user feedback and book reviews, enhancing content quality and user experience dynamically.

E-commerce Platform – zyrohealthcare.com

- Built a complete e-commerce solution including an admin panel, user dashboard, and customer-facing website tailored for healthcare product sales.
- Integrated secure payment gateways, inventory management, order tracking, and a user-friendly product browsing interface to enhance customer experience and streamline backend operations.

MULTI-ADMIN PANEL

- Developed a Multiadmin panel in Laravel allowing multiple users to log in with different credentials and implemented a super admin role to manage all roles and permissions for accessing the panel.
- Followed Laravel's MVC pattern rigorously throughout the development process, utilizing middleware, migrations, seeders, and transactions and many more concepts to ensure a secure and testable application.

DECENTRALIZED APPLICATION (DApp)

- Created a decentralized application (DApp) enabling users to deposit and withdraw payments in cryptocurrencies, fostering seamless interaction with the platform across three key components: a website, member panel, and admin panel.
- Designed and developed a user-friendly website interface, a member panel for individual users to manage their cryptocurrency transactions, and an admin panel with robust control and oversight capabilities for platform management and security.

NETWORK MARKETING SOFTWARE

- Engineered a network marketing software solution to facilitate efficient management of multi-level marketing (MLM) networks, enabling businesses to streamline operations and maximize sales opportunities.
- Developed a comprehensive platform featuring user-friendly interfaces for network members to track sales, commissions, and network growth, alongside administrative tools empowering administrators to monitor performance, manage incentives, and drive organizational success.

ACCOMPLISHMENTS

EASEMYDEAL – Noida, Uttar Pradesh, India

GroundBreaker Award (view) | January 2024

Honored with the prestigious GroundBreaker Award 2024 as part of the IT Team for exceptional innovation and impact in the EaseMyDeal project, demonstrating leadership, technical excellence, and collaborative success.

DIGIATURE TECHNOLOGY – Prayagraj, Uttar Pradesh, India

Appreciation Certificate(view) | May 2022 – June 2022

Received recognition for outstanding performance and contributions during reallifezin project.

MAA GAYATRI DEGREE COLLEGE – Prayagraj, Uttar Pradesh, India

Team Lead | May 2022 – June 2022

Guided and managed the team to fulfill user aspirations. Organized internal coding and discussion sessions for skills development.

ST ANTHONY'S INTER COLLEGE– Pratapgarh, Uttar Pradesh, India

Captain |Aug 2018 – Aug 2019

I served as the Captain of Tagore House at St. Anthony's Inter College, leading my housemates with dedication and responsibility.
